

**IN THE UNITED STATES DISTRICT COURT
FOR THE SOUTHERN DISTRICT OF NEW YORK**

ALTO DYNAMICS, LLC,

Plaintiff,

v.

HARRY’S, INC.,

Defendant.

CIVIL ACTION NO. _____

JURY TRIAL DEMANDED

COMPLAINT FOR PATENT INFRINGEMENT

Plaintiff Alto Dynamics, LLC (“Alto Dynamics” or “Plaintiff”) files this complaint against Defendant Harry’s, Inc. (“Harry’s” or “Defendant”) alleging, based on its own knowledge as to itself and its own actions, and based on information and belief as to all other matters, as follows:

NATURE OF THE ACTION

1. This is a patent infringement action to stop Defendant’s infringement of the following United States Patents (collectively, the “Asserted Patents”), copies of which are attached hereto as **Exhibit A**, **Exhibit B**, **Exhibit C**, **Exhibit D**, and **Exhibit E**, respectively:

	U.S. Patent No.	Title
A.	7,392,160	System And Method For Monitoring Usage Patterns
B.	8,051,098	Systems And Methods For State-Less Authentication
C.	6,662,190	Learning Automatic Data Extraction System
D.	7,152,018	System And Method For Monitoring Usage Patterns
E.	7,657,531	Systems And Methods For State-Less Authentication

2. Alto Dynamics seeks injunctive relief and monetary damages.

PARTIES

3. Alto Dynamics, LLC is a limited liability company organized under the laws of the State of Georgia, with its principal place of business at 4275 Peachtree Corners Circle, Suite 230, Peachtree Corners, Georgia 30092 (Gwinnett County).

4. Defendant is a limited liability company organized under the laws of Delaware with its principal place of business located at located at 75 Varick Street, 9th Floor, New York, New York 10013.

5. Defendant may be served through its registered agent Corporation Service Company, located at 251 Little Falls Drive, Wilmington, Delaware 19808.

JURISDICTION AND VENUE

6. Alto Dynamics repeats and re-alleges the allegations in the Paragraphs above as though fully set forth in their entirety.

7. This is an action for infringement of a United States patent arising under 35 U.S.C. §§ 271, 281, and 284–85, among others. This Court has subject matter jurisdiction of the action under 28 U.S.C. §§ 1331 and 1338(a).

8. Venue is proper against Defendant in this District pursuant to 28 U.S.C. § 1400(b) because it has maintained an established and regular places of business in this District and has committed acts of patent infringement in this District. *See In re Cray Inc.*, 871 F.3d 1355, 1362–1363 (Fed. Cir. 2017).

9. Defendant is subject to this Court’s specific and general personal jurisdiction under due process and/or the New York Long Arm Statute due at least to Defendant’s substantial business in this judicial district, including: (i) at least a portion of the infringement alleged herein; (ii) regularly transacting, doing, and/or soliciting business, engaging in other persistent courses of conduct, or deriving substantial revenue from goods and services provided to individuals in New

York and in this District; and (iii) having an interest in, using or possessing real property in New York.

10. Specifically, Defendant intends to do and does business in, has committed acts of infringement in, and continues to commit acts of infringement in this District directly, through intermediaries, by contributing to and through its inducement of third parties, and offers its products or services, including those accused of infringement here, to customers and potential customers located in New York, including in this District.

11. Defendant maintains regular and established places of business in this District. Defendant owns, operates, manages, conducts business, and directs and controls the operations of, and has employees that work from and out of, facilities at locations in this District, including, but not limited to, the location at 75 Varick Street, 9th Floor, New York, New York 10013.

12. Defendant commits acts of infringement from this District, including, but not limited to, use of the Accused Instrumentalities and inducement of third parties to use the Accused Instrumentalities.

THE ACCUSED INSTRUMENTALITIES

13. Alto Dynamics repeats and re-alleges the allegations in the Paragraphs above as though fully set forth in their entirety.

14. Based upon public information, Defendant owns, operates, advertises, and/or controls the website <https://www.harrys.com/en/us> and associated hardware, software, and functionality that among other features, allows users to view, search, save, and purchase items on Defendant's online sales platform, tracks user activities and preferences (e.g., using cookies), provides website and user authentication (e.g., using user login processes and secured sessions), employs internal company analytics that it offers to its employees and staff, provides the ability to

query and re-select items, facilitates system resource access using secure temporary keys, and allows for the processing of résumés for job applications (the “Accused Instrumentalities”).¹

15. Defendant, directly and/or through its agents and intermediaries, also operates, advertises, and/or controls the locations throughout this District, in which it and its agents, customers, and employees use, advertise, provide, and/or educate third parties about the Accused Instrumentalities.

COUNT I: INFRINGEMENT OF U.S. PATENT NO. 7,392,160

16. Alto Dynamics repeats and re-alleges the allegations in the Paragraphs above as though fully set forth in their entirety.

17. The USPTO duly issued U.S. Patent No. 7,392,160 (the “’160 patent”) on June 24, 2008, after full and fair examination of Application No. 11/557,170, which was filed on November 7, 2006. *See Ex. A*, at A-1.

18. Alto Dynamics owns all substantial rights, interest, and title in and to the ’160 patent, including the sole and exclusive right to prosecute this action and enforce the ’160 patent against infringers, and to collect damages for all relevant times.

19. The claims of the ’160 patent are not directed to an abstract idea and are not limited to well-understood, routine, or conventional activity. Rather, the claimed inventions include inventive components that improve upon the function and operation of preexisting systems and methods for monitoring, recording and analysis of user activity.

20. The written description of the ’160 patent describes in technical detail each limitation of the claims, allowing a skilled artisan to understand the scope of the claims and how the non-conventional and non-generic combination of claim limitations is patently distinct from

¹ *See Ex. F* (Harry’s – Login), *Ex. G*, at 4 (Harry’s – Privacy Policy), and *Ex. H* (Harry’s – Automated Job Application Feature).

and improved upon what may have been considered conventional or generic in the art at the priority date. The '160 patent also identifies and circumscribes all information necessary for a skilled artisan to perform each limitation in the claims in light of that which was known in the art at the priority date.

21. Defendant has infringed and continues to infringe one or more claims of the '160 patent by making, using, providing, supplying, selling, offering for sale, or distributing the Accused Instrumentalities, including, but not limited to, Defendant's deployment of cookies through its online sales platform.

22. Defendant has directly infringed and continues to directly infringe, either literally or under the doctrine of equivalents, at least claim 1 of the '160 patent.

23. For example, the Accused Instrumentalities track user activities and preferences (e.g., using cookies), including by performing, and allowing users to perform a method for monitoring user usage patterns of a system, comprising the steps providing at least one state object, the object including a profile representative of user usage, storing the state object at a client location, passing, to a central server, the state object with each subsequent interaction initiation, and receiving, from the central server, the state object along with the response of the central server, wherein the profile is modified to reflect the interaction between the client location and the central server, and wherein the central server audits the state object/profile passed to it, and performs analysis on the audited profile in order to direct services and/or information suited to the profile to the client location.

24. Since at least the time of receiving notice of this Complaint, Defendant has also indirectly infringed and continues to indirectly infringe the '160 patent by inducing others to directly infringe the '160 patent. Defendant has induced and continues to induce its subsidiaries,

partners, affiliates, and end-users, including Defendant's customers and potential customers, to directly infringe, either literally or under the doctrine of equivalents, the '160 patent by using the Accused Instrumentalities. Defendant has taken active steps, directly or through contractual relationships with others, with the specific intent to cause them to use the Accused Instrumentalities in a manner that infringes one or more claims of the '160 patent, including, for example, claim 1 of the '160 patent. Such steps by Defendant include, among other things, advising or directing personnel, contractors, or end-users to make or use the Accused Instrumentalities in an infringing manner; advertising and promoting the use of the Accused Instrumentalities in an infringing manner; or distributing instructions that guide users to use the Accused Instrumentalities in an infringing manner. Defendant has performed and continues to perform these steps, which constitute induced infringement, with the knowledge of the '160 patent and with the knowledge that the induced acts constitute infringement. Defendant was and is aware that the normal and customary use of the Accused Instrumentalities by others would infringe the '160 patent. Defendant's inducement is ongoing.

25. Since at least the time of receiving notice of this Complaint, Defendant has also indirectly infringed and continues to indirectly infringe by contributing to the infringement of the '160 patent. Defendant has contributed and continues to contribute to the direct infringement of the '160 patent by personnel, contractors, customers, and other end users by encouraging them to use the Accused Instrumentalities to perform the steps of the patented process as described in one or more claims of the '160 patent. The Accused Instrumentalities have special features that are specially designed to be used in an infringing way and that have no substantial uses other than ones that infringe one or more claims of the '160 patent, including, for example, claim 1 of the '160 patent. The special features include, for example, the method recited in claim 1, including

all the intermediary steps, that allow the claimed method of monitoring user usage patterns of a system. The special features constitute a material part of the invention of one or more of the claims of the '160 patent and are not staple articles of commerce suitable for substantial non-infringing use. Defendant's contributory infringement is ongoing.

26. Defendant has had knowledge of the '160 patent at least as of the date when it was notified of the filing of this action.

27. Furthermore, on information and belief, Defendant has a policy or practice of not reviewing the patents of others (including instructing its employees to not review the patents of others), and thus has been willfully blind of Alto Dynamics' patent rights.

28. Defendant's actions are at least objectively reckless as to the risk of infringing a valid patent and this objective risk was either known or should have been known by Defendant.

29. Since at least the time of receiving notice of this Complaint, Defendant's direct and indirect infringement of the '160 patent is, has been, and continues to be willful, intentional, deliberate, or in conscious disregard of Alto Dynamics' rights under the patent.

30. Alto Dynamics or its predecessors-in-interest have satisfied all statutory obligations required to collect pre-filing damages for the full period allowed by law for infringement of the '160 patent.

31. Alto Dynamics has been damaged and continues to be damaged as a result of the infringing conduct by Defendant alleged above. Thus, Defendant is liable to Alto Dynamics in an amount that compensates it for such infringement, which by law cannot be less than a reasonable royalty, together with interest and costs as fixed by this Court under 35 U.S.C. § 284.

32. Alto Dynamics has suffered and continues to suffer irreparable harm, through its loss of market share and goodwill, for which there is no adequate remedy at law. Alto Dynamics

has suffered and will continue to suffer this harm by virtue of each Defendant's infringement of the '160 patent. Defendant's actions have interfered with and will interfere with Alto Dynamics' ability to license technology. The balance of hardships favors Alto Dynamics' ability to commercialize its own ideas and technology. The public interest in allowing Alto Dynamics to enforce its right to exclude outweighs other public interests, which supports injunctive relief in this case.

COUNT II: INFRINGEMENT OF U.S. PATENT NO. 8,051,098

33. Alto Dynamics repeats and re-alleges the allegations in the Paragraphs above as though fully set forth in their entirety.

34. The USPTO duly issued U.S. Patent No. 8,051,098 (the "'098 patent") on November 1, 2011, after full and fair examination of Application No. 12/691,547, which was filed on January 21, 2010. *See Ex. B*, at B-1. A Certificate of Correction was issued on June 12, 2012. *See id.*, at B-20.

35. Alto Dynamics owns all substantial rights, interest, and title in and to the '098 patent, including the sole and exclusive right to prosecute this action and enforce the '098 patent against infringers, and to collect damages for all relevant times.

36. The claims of the '098 patent are not directed to an abstract idea and are not limited to well-understood, routine, or conventional activity. Rather, the claimed inventions include inventive components that improve upon the function and operation of preexisting systems and methods for authenticating users of program objects in distributed computing environments based on negotiated security contexts.

37. The written description of the '098 patent describes in technical detail each limitation of the claims, allowing a skilled artisan to understand the scope of the claims and how the non-conventional and non-generic combination of claim limitations is patently distinct from

and improved upon what may have been considered conventional or generic in the art at the priority date. The '098 patent also identifies and circumscribes all information necessary for a skilled artisan to perform each limitation in the claims in light of that which was known in the art at the priority date.

38. Defendant has infringed one or more claims of the '098 patent by making, using, providing, supplying, selling, offering for sale, or distributing the Accused Instrumentalities, including, but not limited to, Defendant's employ of secure communication sessions between user computing device and a logon component on its online sales platform.

39. Defendant has directly infringed, either literally or under the doctrine of equivalents, at least claim 1 of the '098 patent.

40. For example, the Accused Instrumentalities provide website and user authentication (e.g., using user login processes and secured sessions), including by performing, and allowing users to perform a method for accessing any of a plurality of resources wherein at least some of the resources do not share a common processing platform, comprising the steps of establishing a secure communication session between a user computing device and a logon component, wherein the secure communication session comprises a temporary, interactive information exchange that is set up and then torn down; verifying logon information provided by the user computing device to the logon component using the secure communication session and responsively generating a security context to be employed by the user computing device that is unique to a user of the user computing device and necessary to access any of the plurality of resources without requiring any follow-on authorization communications between the accessed resource and the logon component.

41. Alto Dynamics or its predecessors-in-interest have satisfied all statutory obligations required to collect pre-filing damages for the full period allowed by law for infringement of the

'098 patent.

42. Alto Dynamics has been damaged as a result of the infringing conduct by Defendant alleged above. Thus, Defendant is liable to Alto Dynamics in an amount that compensates it for such infringement, which by law cannot be less than a reasonable royalty, together with interest and costs as fixed by this Court under 35 U.S.C. § 284.

COUNT III: INFRINGEMENT OF U.S. PATENT NO. 6,662,190

43. Alto Dynamics repeats and re-alleges the allegations in the Paragraphs above as though fully set forth in their entirety.

44. The United States Patent and Trademark Office ("USPTO") duly issued U.S. Patent No. 6,662,190 (the "'190 patent") on December 9, 2003, after full and fair examination of Application No. 09/812,425, which was filed on March 20, 2001. *See Ex. C*, at C-1.

45. Alto Dynamics owns all substantial rights, interest, and title in and to the '190 patent, including the sole and exclusive right to prosecute this action and enforce the '190 patent against infringers, and to collect damages for all relevant times.

46. The claims of the '190 patent are not directed to an abstract idea and are not limited to well-understood, routine, or conventional activity. Rather, the claimed inventions include inventive components that improve upon the function and operation of preexisting systems and methods of database searching techniques and systems.

47. The written description of the '190 patent describes in technical detail each limitation of the claims, allowing a skilled artisan to understand the scope of the claims and how the non-conventional and non-generic combination of claim limitations is patently distinct from and improved upon what may have been considered conventional or generic in the art at the priority date. The '190 patent also identifies and circumscribes all information necessary for a skilled artisan to perform each limitation in the claims in light of that which was known in the art at the

priority date.

48. Defendant has infringed one or more claims of the '190 patent by making, using, providing, supplying, selling, offering for sale, or distributing the Accused Instrumentalities, including, but not limited to, processing the résumés uploaded to its online sales platform and that platform's provision of a browse history to its users, along with the ability to re-select items.

49. Defendant has directly infringed, either literally or under the doctrine of equivalents, at least claim 1 of the '190 patent.

50. For example, the Accused Instrumentalities employ text mining capabilities, including by performing, and allowing users to perform, through its résumé uploading feature(s), a method for data extraction of a text file to a record file, said method comprising the steps of identifying an area of interest in a text file, parsing said area of interest in order to identify a list of values of attributes in said area of interest, recognizing a first set of values in said list that match values contained in an attribute value vocabulary, forming a record using said first set of values, gleaning a second set of values in said list that do not match values contained in said attribute value vocabulary, and adding said second set of values to said record.

51. Alto Dynamics or its predecessors-in-interest have satisfied all statutory obligations required to collect pre-filing damages for the full period allowed by law for infringement of the '190 patent.

52. Alto Dynamics has been damaged as a result of the infringing conduct by Defendant alleged above. Thus, Defendant is liable to Alto Dynamics in an amount that compensates it for such infringement, which by law cannot be less than a reasonable royalty, together with interest and costs as fixed by this Court under 35 U.S.C. § 284.

COUNT IV: INFRINGEMENT OF U.S. PATENT NO. 7,152,018

53. Alto Dynamics repeats and re-alleges the allegations in the Paragraphs above as

though fully set forth in their entirety.

54. The USPTO duly issued U.S. Patent No. 7,152,018 (the “’018 patent”) on December 19, 2006, after full and fair examination of Application No. 10/499,578, which was filed on December 18, 2002. *See Ex. D*, at D-1. A certificate of correction was issued on December 19, 2006. *Id.*, at D-11–12.

55. Alto Dynamics owns all substantial rights, interest, and title in and to the ’018 patent, including the sole and exclusive right to prosecute this action and enforce the ’018 patent against infringers, and to collect damages for all relevant times.

56. The claims of the ’018 patent are not directed to an abstract idea and are not limited to well-understood, routine, or conventional activity. Rather, the claimed inventions include inventive components that improve upon the function and operation of preexisting systems and methods for monitoring, recording and analysis of user activity.

57. The written description of the ’018 patent describes in technical detail each limitation of the claims, allowing a skilled artisan to understand the scope of the claims and how the non-conventional and non-generic combination of claim limitations is patently distinct from and improved upon what may have been considered conventional or generic in the art at the priority date. The ’018 patent also identifies and circumscribes all information necessary for a skilled artisan to perform each limitation in the claims in light of that which was known in the art at the priority date.

58. Defendant has infringed and continues to infringe one or more claims of the ’018 patent by making, using, providing, supplying, selling, offering for sale, or distributing the Accused Instrumentalities, including, but not limited to, Defendant’s employ of cookies for its online sales platform.

59. Defendant has directly infringed and continues to directly infringe, either literally or under the doctrine of equivalents, at least claim 1 of the '018 patent.

60. For example, the Accused Instrumentalities track user activities and preferences (e.g., using cookies), including by performing, and allowing users to perform a method of monitoring user usage patterns of a system, comprising the steps of providing at least one state object, the object including a profile representative of user usage, storing the state object at a client location, passing, to a central server, the state object with each subsequent interaction initiation, and receiving, from the central server, the state object along with the response of the central server, wherein the profile is modified, to reflect the interaction between the client location and the central server, by one of one or more scripts within or included in information/resources provided to the client location by the central server, and one or more programs executed at the client location, thus precluding manipulation of the profile by the server.

61. Since at least the time of receiving notice of this Complaint, Defendant has also indirectly infringed and continues to indirectly infringe the '018 patent by inducing others to directly infringe the '018 patent. Defendant has induced and continues to induce their subsidiaries, partners, affiliates, and end-users, including Defendant's customers and potential customers, to directly infringe, either literally or under the doctrine of equivalents, the '018 patent by using the Accused Instrumentalities. Defendant has taken active steps, directly or through contractual relationships with others, with the specific intent to cause them to use the Accused Instrumentalities in a manner that infringes one or more claims of the '018 patent, including, for example, claim 1 of the '018 patent. Such steps by Defendant include, among other things, advising or directing personnel, contractors, or end-users to make or use the Accused Instrumentalities in an infringing manner; advertising and promoting the use of the Accused

Instrumentalities in an infringing manner; or distributing instructions that guide users to use the Accused Instrumentalities in an infringing manner. Defendant has performed and continues to perform these steps, which constitute induced infringement, with the knowledge of the '018 patent and with the knowledge that the induced acts constitute infringement. Defendant was and is aware that the normal and customary use of the Accused Instrumentalities by others would infringe the '018 patent. Defendant's inducement is ongoing.

62. Since at least the time of receiving notice of this Complaint, Defendant has also indirectly infringed and continues to indirectly infringe by contributing to the infringement of the '018 patent. Defendant has contributed and continues to contribute to the direct infringement of the '018 patent by personnel, contractors, customers, and other end users by encouraging them to use the Accused Instrumentalities to perform the steps of the patented process as described in one or more claims of the '018 patent. The Accused Instrumentalities have special features that are specially designed to be used in an infringing way and that have no substantial uses other than ones that infringe one or more claims of the '018 patent, including, for example, claim 1 of the '018 patent. The special features include, for example, the method recited in claim 1, including all the intermediary steps, that allow the claimed method of monitoring user usage patterns of a system. The special features constitute a material part of the invention of one or more of the claims of the '018 patent and are not staple articles of commerce suitable for substantial non-infringing use. Defendant's contributory infringement is ongoing.

63. Defendant has had knowledge of the '018 patent at least as of the date when it was notified of the filing of this action.

64. Furthermore, on information and belief, Defendant has a policy or practice of not reviewing the patents of others (including instructing its employees to not review the patents of

others), and thus has been willfully blind of Alto Dynamics' patent rights.

65. Defendant's actions are at least objectively reckless as to the risk of infringing a valid patent and this objective risk was either known or should have been known by Defendant.

66. Since at least the time of receiving notice of this Complaint, Defendant's direct and indirect infringement of the '018 patent is, has been, and continues to be willful, intentional, deliberate, or in conscious disregard of Alto Dynamics' rights under the patent.

67. Alto Dynamics or its predecessors-in-interest have satisfied all statutory obligations required to collect pre-filing damages for the full period allowed by law for infringement of the '018 patent.

68. Alto Dynamics has been damaged and continues to be damaged as a result of the infringing conduct by Defendant alleged above. Thus, Defendant is liable to Alto Dynamics in an amount that compensates it for such infringement, which by law cannot be less than a reasonable royalty, together with interest and costs as fixed by this Court under 35 U.S.C. § 284.

69. Alto Dynamics has suffered and continues to suffer irreparable harm, through its loss of market share and goodwill, for which there is no adequate remedy at law. Alto Dynamics has and will continue to suffer this harm by virtue of each Defendant's infringement of the '018 patent. Defendant's actions have interfered with and will interfere with Alto Dynamics' ability to license technology. The balance of hardships favors Alto Dynamics' ability to commercialize its own ideas and technology. The public interest in allowing Alto Dynamics to enforce its right to exclude outweighs other public interests, which supports injunctive relief in this case.

COUNT V: INFRINGEMENT OF U.S. PATENT NO. 7,657,531

70. Alto Dynamics repeats and re-alleges the allegations in the Paragraphs above as though fully set forth in their entirety.

71. The USPTO duly issued U.S. Patent No. 7,657,531 (the "'531 patent") on February

2, 2010, after full and fair examination of Application No. 11/325,463, which was filed on January 5, 2006. *See Ex. E*, at E-1. A Certificate of Correction was issued on November 13, 2010. *See id.*, at E-20.

72. Alto Dynamics owns all substantial rights, interest, and title in and to the '531 patent, including the sole and exclusive right to prosecute this action and enforce the '531 patent against infringers, and to collect damages for all relevant times.

73. The claims of the '531 patent are not directed to an abstract idea and are not limited to well-understood, routine, or conventional activity. Rather, the claimed inventions include inventive components that improve upon the function and operation of preexisting systems and methods for authenticating users of program objects in distributed computing environments based on negotiated security contexts.

74. The written description of the '531 patent describes in technical detail each limitation of the claims, allowing a skilled artisan to understand the scope of the claims and how the non-conventional and non-generic combination of claim limitations is patently distinct from and improved upon what may have been considered conventional or generic in the art at the priority date. The '531 patent also identifies and circumscribes all information necessary for a skilled artisan to perform each limitation in the claims in light of that which was known in the art at the priority date.

75. Defendant has infringed one or more claims of the '531 patent by making, using, providing, supplying, selling, offering for sale, or distributing the Accused Instrumentalities, including, but not limited to, Defendant's employ of secure communication sessions between user computing device and a logon component on its online sales platform.

76. Defendant has directly infringed, either literally or under the doctrine of

equivalents, at least claim 1 of the '531 patent.

77. For example, the Accused Instrumentalities provide website and user authentication (*e.g.*, using user login processes and secured sessions), including by performing, and allowing users to perform a method of enabling access to a resource of a distributed application server or processing system by a user/client application possessing a valid security-context, comprising the steps of, receiving the security-context and an appended protected security-context renewal request provided by the user to an access authorization component of the application server or processing system, verifying the validity of the security-context and the security-context renewal request, extracting content of both the security-context and the security-context renewal request, comparing current time to an expiration time identifying time of expiration of the security-context, if the expiration time is less than the current time, comparing the security-context renewal request with stored identity and authorization information comprising at least one of a user identifier, an organization identifier, a sub-organization identifier, a key, an authentication certificate, an user location, a user role, and an user position identifying the user to the access authorization component and generating a new symmetric key, and other access and authorization information, generating an updated security-context based on the verifying of the user's identity and authorization and based on the user having requested authority for access to the resource and services; providing the updated security context to the user, and sending the updated security-context and a request for access to the resource and services by the user to the application server or processing system.

78. Alto Dynamics or its predecessors-in-interest have satisfied all statutory obligations required to collect pre-filing damages for the full period allowed by law for infringement of the '531 patent.

79. Alto Dynamics has been damaged as a result of the infringing conduct by Defendant alleged above. Thus, Defendant is liable to Alto Dynamics in an amount that compensates it for such infringement, which by law cannot be less than a reasonable royalty, together with interest and costs as fixed by this Court under 35 U.S.C. § 284.

JURY DEMAND

80. Alto Dynamics hereby requests a trial by jury on all issues so triable by right.

PRAYER FOR RELIEF

81. WHEREFORE, Alto Dynamics requests that the Court find in its favor and against Defendant, and that the Court grant Alto Dynamics the following relief:

- a. Judgment that one or more claims of the Asserted Patents has been infringed, either literally or under the doctrine of equivalents, by Defendant or all others acting in concert therewith;
- b. A permanent injunction enjoining Defendant and its officers, directors, agents, servants, affiliates, employees, divisions, branches, subsidiaries, parents, and all others acting in concert therewith from infringement of the '160 patent and the '018 patent; or, in the alternative, an award of a reasonable ongoing royalty for future infringement of the '160 patent and the '018 patent by such entities;
- c. Judgment that Defendant account for and pay to Alto Dynamics all damages to and costs incurred by Alto Dynamics because of Defendant's infringing activities and other conduct complained of herein;
- d. Judgment that Defendant's infringement of the '160 patent and the '018 patent be found willful, and that the Court award treble damages for the period of such willful infringement pursuant to 35 U.S.C. § 284;

- e. Pre-judgment and post-judgment interest on the damages caused by Defendant's infringing activities and other conduct complained of herein;
- f. That this Court declare this an exceptional case and award Alto Dynamics its reasonable attorneys' fees and costs in accordance with 35 U.S.C. § 285; and
- g. All other and further relief as the Court may deem just and proper under the circumstances.

Dated: November 18, 2022

Respectfully submitted,

By: /s/ Travis E. Lynch
